Community Support

Join a network of like-minded learners and industry experts.

Industry PROJECTS

E-Commerce Platform

Build an online shopping platform with features like product listings, user authentication, and shopping cart.

Social Media Application

Build an online shopping platform with features like product listings, user authentication, and shopping cart.

Learning Management System (LMS)

Create a platform for online courses with features like instructor dashboards, video uploads, student progress tracking, and certifications.

Online Job Portal

Build a platform where job seekers can upload resumes, search for jobs, and apply, while recruiters can post job listings and manage applications.

Hospital Management System

Design a system to manage patient records, doctor schedules, appointment bookings, and billing.

Food Delivery App

Create a web and mobile application for users to order food, with features like restaurant search, order tracking, and user reviews.

Personal Finance Tracker

Build an app to help users track expenses, set budgets, and generate reports for better financial management.

Travel Booking System

Design a platform for booking flights, hotels, and tours with integrated payment options and user reviews.

Online Examination System

Build a system for conducting online tests with features like timer-based assessments, question banks, and automatic grading.

Online Movie Ticket Booking

Build a platform where users can search for movies, view available seats, and book tickets with online payment options.

SkyllX partner companies.

#4

Job Readiness Program

Soft skills training and career guidance.

#5

Guaranteed Interview Opportunities

For top-performing students.

Hear from OUR LEARNERS

MANOJ SHINDE

I appreciate how you created a positive classroom environment and how you motivate us to stand up in life. The real world-based learning activity you introduced was a great way to engage students. Your lesson on fractions was very well-organized and interactive. The hands-on activities helped students grasp complex concepts easily. Thank you Skyllx

SOUJANYA UPANAL

The decision to join Skyllx has been the best decision of my life. Now, what I'm learning through our interactions feels like I'm truly growing in my field. Thank you for your guidance; your teaching style is excellent. Let's continue.

SUNIL

I have chosen a good training center. The content was comprehensive and well structured, and the instructors provided clear explanations. The practical assignments and projects were valuable for gaining hands-on experience. Effective communication skills are key job placement and there are experienced people at the institute. So if you are looking to develop your future into the Java Full Stack course, I would surely recommend going with this Skyllx institute.

MAHANTHESH

Firstly, I want to express my gratitude because I have chosen a good training center. For aspiring data analysts, strong analytical thinking, attention to detail, and effective communication skills are key. I like Siddhu Sir very much, and his teaching makes sense to me. Siddhu Sir is an experienced person, so I have confidence in him. I believe that I will get a good job in the future. I also have confidence in this training center and . I'm very happy to have gotten a teacher like you, and I'm proud. Finally, thank you so much, sir!

Master the Art of Full Stack Development with Skyllx

Transform your career with our **comprehensive Java Full Stack Development Course**, designed for aspiring developers and IT professionals. Learn industry-relevant skills, build real-world applications, and become a job-ready full-stack developer.
